Starting date:

flexible

Available Postdoc Position

The Probability group of the Department of Mathematics of the University of Fribourg invites applications for a postdoc position under the supervision of Prof. Ioan Manolescu.

Candidates must have a strong background in probability, specifically in statistical mechanics. They will be expected to work on lattice models such as percolation, the random cluster, six vertex or loop $O(n)$ models or self-avoiding walk.

Duties include a light teaching load: exercise sessions or the organization of a reading group. We offer a friendly working environment, funds for traveling and an attractive salary. The position is for a period of one year.

Knowledge of French or German is desirable but not mandatory.

Starting date: flexible, ideally September 2022.

Applications, composed of a cover letter, a CV, a short research project and two letters of recommendation (sent directly by their authors), should be submitted electronically to ioan.manolescu@unifr.ch. They will be evaluated first on February 15th 2022, then on the on a rolling basis.
